Professional Profile

Bilingual Electronics Engineer (Spanish/English C2) with 5+ years of professional, corporate experience across a multi-industry track record for national and international clients in Technology, Scientific Instrumentation, IT Consulting, Banking, and Intelligent Transportation. Since 2024, implementing applied AI business solutions and automations, systems integration, and custom development.

Education

Universidad Nueva Esparta, Electronics Engineer – Los Naranjos, Caracas - Venezuela

Nov 2018

- Capstone Project: Remote crop monitoring and control system via an Android mobile application using Bluetooth technology.

Experience

Independent Consultant, AI Engineer

Oct 2024 – present

End-to-end design, development, and deployment of applied AI and automation solutions for SMB business cases: automated reporting pipelines, self-hosted web platforms, BI dashboards, and cloud architectures (GCP, Debian, Docker, n8n, PostgreSQL), all validated in production on proprietary infrastructure. Technical detail in the Projects section.

Soluciones Administrativas Cobremex, C.A., IoT Solutions Engineer

May 2024 – Sept 2024

Led the technical proposal and architectural documentation design for implementing an IoT vehicle access control system integrated with an existing toll platform.

Anyware Venezuela, C.A., Hardware Engineer

Feb 2024 – May 2024

Designed a hardware extension board (HAT/shield-type) for a parking control system based on a Raspberry Pi controller board.

Paytech Corporation, C.A., Hardware Engineer

Feb 2023 – Feb 2024

Executed, supervised, and delegated nationwide on-site installations and preventive/corrective maintenance of the company's hardware solution, to maintain and improve SLA service and operability levels. Improved an ESP32-based vehicle access control board for parking systems, migrating to SMD component technology and upgrading from manual to automated production with suppliers in China, reducing costs and product replenishment lead times. Managed local and international inventory and procurement of components and internal technology equipment.

Thermo Fisher Scientific Venezuela, BEINCA C.A., Field Service Engineer

Nov 2021 – Dec 2022

Performed on-site and remote installation and preventive/corrective maintenance of hardware, networks, and software for materials-analysis electron microscopy systems and their accessories, for clients in Chile, Panama, the Dominican Republic, and Brazil. Managed domestic and international procurement of components and equipment, inventory, and the corporate vehicle.

Independent Contractor, IT Support Engineer

Jan 2020 – Oct 2021

Preventive and corrective maintenance of hardware, Windows, and networks; design and installation of LAN/WLAN networks and high-performance workstations, for individuals and SMBs.

Corporación Audvintech, C.A., Multimedia Infrastructure Engineer

Sept 2019 – Dec 2019

Biannual preventive and corrective maintenance of multimedia videoconferencing servers for a banking client in Bogotá, Quito, Lima, and Port of Spain. Trained clients on multimedia systems usage.

Projects

AI Automation System for PDF Report Generation [↗](#)

Automated workflow that generates PDF reports of key operational and management metrics for a company's sales and warehouse department, based on real-time, read-only access (via predefined functions) to the database, with email delivery and configurable frequency.

- PDF with executive summary. Predefined, configurable, and deterministic PDF template, custom-designed.
- Cloud deployment on Google Cloud, Compute Engine server running Debian 12 Linux, database connection via PostgreSQL, AI layer using the OpenRouter API, Resend API for email delivery, n8n as orchestrator.

Enterprise Chatbot-Style Web Application Platform [↗](#)

Conversational AI platform for businesses: managed team access to multiple models, with full control over which sources — public or private — each one can query.

- Designed and deployed a VCN network and Google Cloud server for self-hosting a packaged, open-source monolithic application, controlling access, management, and infrastructure costs, AI token costs, and bandwidth.
- Deployed and configured a Compute Engine VPS server running Debian 12 Linux (firewall, NGINX, SSL, UFW, Fail2Ban, SSH). Managed activation and configuration of a custom domain.

Interactive Executive Insurance Analytics Dashboard [↗](#)

Business Intelligence solution giving an insurance company executive visibility into its portfolio, claims, and risk to support business decisions

- Built executive dashboards in Google Looker Studio (portfolio, claims, operations, and risk), validated by cross-checking filters by line of business, region, and status.
- Designed the underlying data layer and its verification through Python-based healthcheck scripts, and PostgreSQL.

Cinema Ticket Booking Web Platform (GoldenMovies) [↗](#)

Web application for cinema ticket booking. Development focused on frontend design and functionality using Next.js 16, TypeScript, and React Server Components, with an interactive seat map and dynamic pricing by audience type. Documentation of the proposed path to production for the backend, mapping each endpoint to its database-backed equivalent.

Architecture Package for Hydroponic Control System [↗](#)

Technical documentation and IoT High-Level/Low-Level Architecture design for implementing a hydroponic control system.

- Documented the full architecture (C4 diagrams, requirements specification, design decisions) covering hardware, backend, security, and data flow

Tech Stack

n8n - OpenAI API - LM Studio - Ollama - OpenRouter - OpenWebUI - HuggingFace - Claude Code - Python - TypeScript - JavaScript - Node.js - Fastify - React - Next.js - Docker - Docker Compose - Ansible - CI/CD - Git - GitHub - Bitbucket - Nginx - Coolify - WireGuard - Tailscale - Linux - Google Cloud - AWS - Oracle Cloud - DigitalOcean - Hostinger - Supabase - PostgreSQL - Redis - MongoDB - HTML5 - CSS3 - Tailwind CSS - shadcn/ui - WordPress - Elementor - Bash - PowerShell - JSON - XML - New Relic - Postman - Google Looker Studio - BI

Courses and Certifications

English C2 (EF SET, April 2025); Introduction to Networks I (CCNA, CISCO VE); Practical Introduction to Python (Platzi Inc. USA); Introduction to Project Management (Colegio de Ingenieros de Venezuela); 2D Design with AutoCAD (Abstract Training Center).
